## Full Sun, Partial Sun, Partial Shade...What?

You're looking at your plant tag to see if it's a plant you can grow. It tells you your plant wants partial sun. Do you know what that means?

**BELOW ARE SOME COMMON STANDARDS FOR SUN EXPOSURE.**

- **Full Sun:** 6 full hours of direct sunlight.
- **Partial Sun/Partial Shade:** 3-6 hours of sunlight each day. Partial shade means morning and early afternoon sun; partial sun means relief from the intense late afternoon sun is needed.
- **Full Shade:** less than 3 hours of direct sunlight each day - best if it's morning light. Full shade likes a filtered sunlight the remainder of the day. Every plant needs some sun; even those that thrive in full shade.
- **To this list we might also add Dappled Sun:** similar to partial shade. The plants are getting partial sun as it makes its way through the branches of a deciduous tree.
